## IN THE SENATE OF THE UNITED STATES

SEPTEMBER 22 (legislative day, SEPTEMBER 17), 2008

Mr. BROWN introduced the following bill; which was read twice and referred  
to the Committee on Banking, Housing, and Urban Affairs

---

## A BILL

To establish the Stephanie Tubbs Jones Gift of Life Medal  
for organ donors and the family of organ donors.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE; FINDINGS.**

4       (a) **SHORT TITLE.**—This Act may be cited as the  
5       “Stephanie Tubbs Jones Gift of Life Medal Act of 2008”.

6       (b) **FINDINGS.**—The Congress makes the following  
7       findings:

8               (1) Congresswoman Stephanie Tubbs Jones was  
9       dedicated to eliminating health disparities and pro-  
10      tecting vulnerable populations.

1           (2) Through her service on the Committee on  
2       Ways and Means, Subcommittee on Health, she was  
3       a strong voice for those who were poor, elderly, ra-  
4       cial and ethnic minorities, and disenfranchised.

5           (3) Congresswoman Stephanie Tubbs Jones'  
6       concern for others was demonstrated by the decision  
7       to donate her organs, so that as her life ended, the  
8       lives of others continued.

9           (4) There are currently 99,625 candidates for  
10      organ donation on the national transplant waiting  
11      list. Every 16 minutes, a new name is added to such  
12      list. Sixteen persons die each day waiting for a life  
13      saving organ transplant.

14          (5) Minority populations account for nearly 50  
15      percent of those on the national transplant waiting  
16      list.

17          (6) Diseases that can lead to organ failure,  
18      such as hypertension and diabetes, are found more  
19      frequently in ethnic minority populations than in the  
20      general population.

21          (7) While minorities donate organs in propor-  
22      tion to their population, the rate of organ donations  
23      fails to keep pace with the need for transplants in  
24      the population. African-Americans, for example, rep-  
25      resent about 13 percent of the population and 12

1       percent of organ donors, but comprise roughly 23  
2       percent of individuals on national transplant waiting  
3       list for kidney transplants.

4           (8) Transplantation success rates are higher  
5       when organs are matched between people sharing  
6       the same racial and ethnic background.

7           (9) Because of the disparities in the need for  
8       organs, minorities are more likely to wait longer to  
9       find a successful match and are more likely to be  
10      sicker when an organ is found.

11          (10) An increase in minority organ donations  
12      would decrease the waiting time and increase the  
13      likelihood of successful transplantations for minori-  
14      ties.

15 **SEC. 2. ELIGIBILITY REQUIREMENTS FOR STEPHANIE**  
16 **TUBBS JONES GIFT OF LIFE MEDAL.**
